

SECURE CREATORS

CAPABILITY STATEMENT

Secure Creators

Cybersecurity and Consulting

Cybersecurity, authorization, and offensive security support for federal mission systems.

SERVICE-DISABLED VETERAN-OWNED SMALL BUSINESS • UEI: M6T7M4FBY6U9 • CAGE: 9LQF8 • TAMPA, FL

RMF & Authorization Support

Execution and sustainment of cybersecurity activities across the RMF lifecycle.

- RMF preparation and system categorization
- SSP development and security control implementation
- Security risk assessment, gap analysis, and assessment readiness
- POA&M development, tracking, and remediation
- Continuous monitoring (ConMon) support
- ATO and reauthorization support

Cybersecurity Engineering & Mission Systems

Engineering and technical support for mission and enterprise systems.

- Cybersecurity engineering for mission and enterprise systems
- Secure system architecture and design
- Control implementation across systems and infrastructure
- Secure configuration and hardening, STIG-aligned
- Change impact analysis for modifications and upgrades

Why Secure Creators

- **SDVOSB certified.** Service-Disabled Veteran-Owned Small Business, SBA VetCert verified. Eligible for SDVOSB set-aside and sole-source awards. Founded and led by a U.S. Air Force veteran.
- **A GCC High CUI enclave.** Active Microsoft GCC High environment aligned to NIST SP 800-171, the control set behind CMMC Level 2. CUI stays in a compliant enclave, not a standard commercial cloud.
- **Credentialed practitioners.** CISSP, CMMC RP, ISO/IEC 27001 Lead Implementer and Lead Auditor, CISM, PMP, and OSCP and OSEP certified offensive security engineers.
- **Three disciplines, one firm.** Authorization, secure engineering, and offensive security under one roof. RMF and ATO support, hardening, and adversarial validation come from one accountable team, not three vendors to coordinate.

Security Assessment & Penetration Testing

Offensive validation of mission and enterprise systems by certified operators.

- Penetration testing across network, web application, and cloud
- Red team operations and adversarial threat emulation
- OT and SCADA security testing
- Vulnerability assessment, scanning, and management
- Technical reporting and remediation validation

Embedded Security Leadership

ISSO and ISSM execution and advisory support aligned to program requirements.

- ISSO and ISSM execution and advisory support
- Cybersecurity governance and risk ownership
- Incident response and contingency planning
- Audit, inspection, and oversight support
- Coordination with engineering and authorization teams

OUR MISSION

Securing the mission-critical systems our nation, and its warfighters, depend on.

Business Information

Registered Name	Secure Creators Cybersecurity and Consulting
Business Type	Small Business, Service-Disabled Veteran-Owned Small Business (SDVOSB)
Certification	SDVOSB, SBA VetCert verified
Formation Date	May 2023
Unique Entity ID (UEI)	M6T7M4FBY6U9
CAGE Code	9LQF8
Location	Tampa, FL

Point of Contact

Vinnie Antinarelli

Chief Executive Officer

Team Certifications & Qualifications

GOVERNANCE, RISK & COMPLIANCE

CISSP · CMMC Registered Practitioner (RP) · ISO/IEC 27001 Lead Implementer · ISO/IEC 27001 Lead Auditor · CISM · PMP · ITIL

OFFENSIVE SECURITY

OSCP · OSCE · OSEP · OSWE · OSED · CRTO · GPEN · GWAPT · CEH

EXPERIENCE BASE

Former CISO and CTO executive leadership in cybersecurity services · Microsoft Azure GCC High design and operation · OT/SCADA and cloud security testing · FedRAMP, NIST SP 800-171, and CMMC program support · U.S. Air Force veteran leadership

Relevant Experience: Commercial Program Execution

Secure Creators delivers cybersecurity program execution for commercial organizations under the same discipline applied to federal programs:

- Gap and risk assessments against SOC 2, ISO 27001, CMMC, and NIST frameworks
- Security program implementation and management
- Penetration testing and security assessment delivery
- Virtual CISO (vCISO) program leadership
- Audit readiness preparation and audit support
- Policy and security documentation development
